

# OptimaWell

## *Artificial Intelligence & Machine Learning Project – Toolbox – Radar (PTR) To Deliver Business Integrated Solutions*

**José Luis Ortiz Volcán**  
Consultant & CEO OptimaWell

# Purpose of this Document

*Provide an overview of the  
OptimaWell Approach  
for Application of  
Artificial Intelligence and Machine Learning  
to Deliver Business Integrated Solutions*

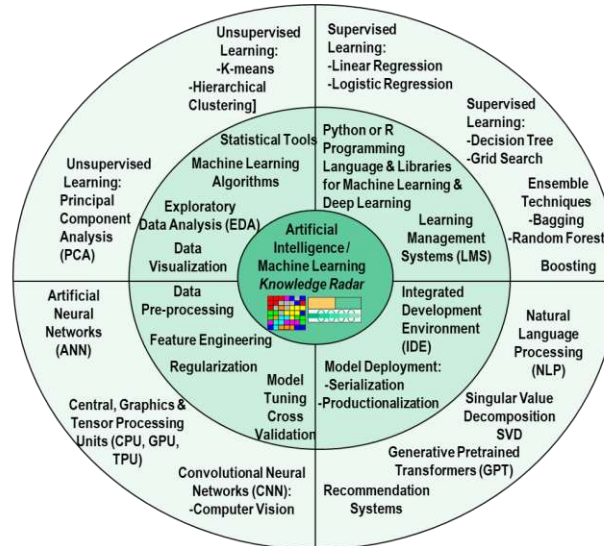

## Projects

## Toolbox

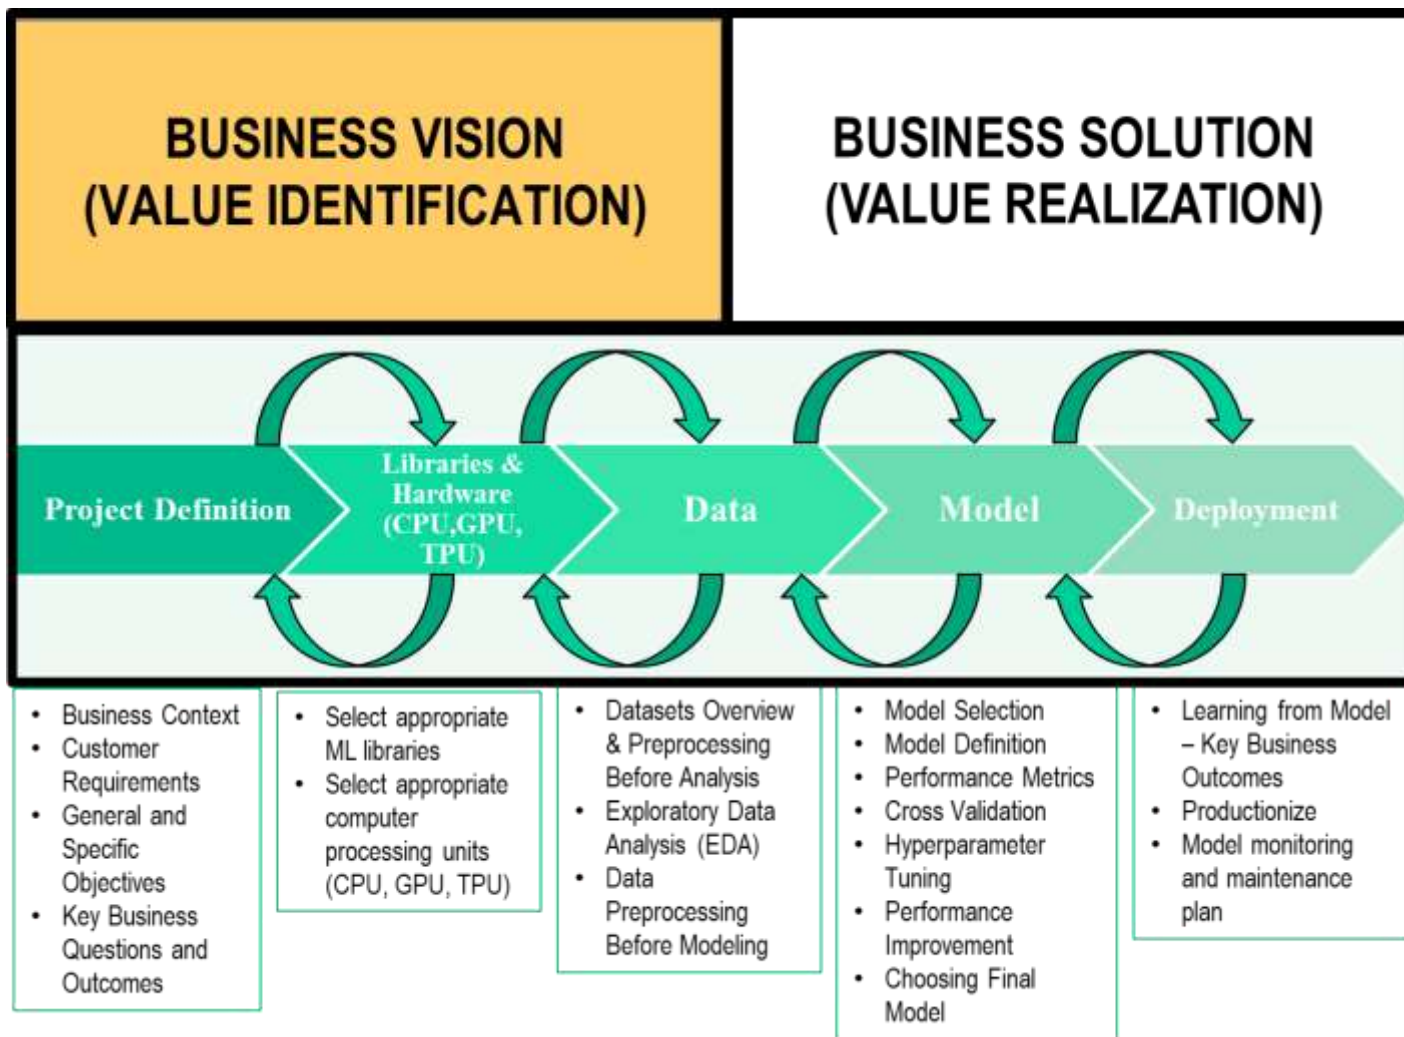

## Radar

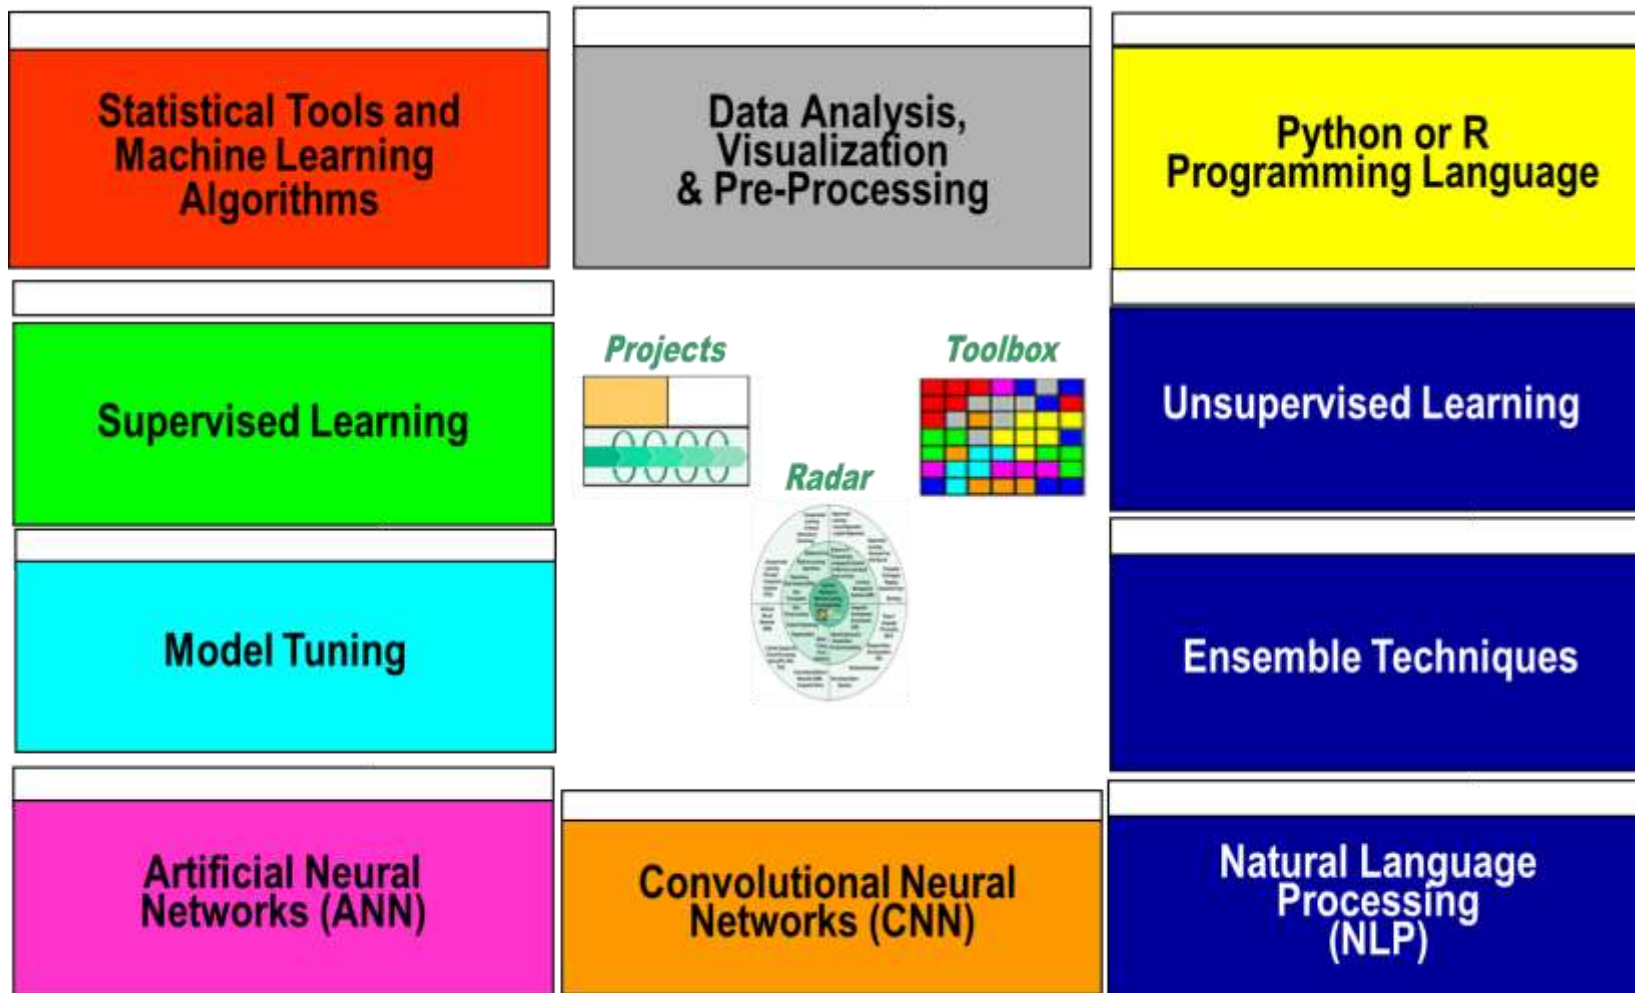

## Maturation – Multiple Learning Loops

## Ecosystem of Libraries (part 1 of 2)

## Ecosystem of Libraries (part 2 of 2)

### Artificial Intelligence / Machine Learning

#### Supervised Learning

Computer algorithms that are trained on input data that has been labeled for a particular output.

#### Unsupervised Learning

Algorithms that discover hidden patterns or data groupings without the need for human intervention, effective for analyzing and clustering unlabeled datasets.

#### Artificial Neural Networks (ANN)

Algorithms that learn (or are trained) by processing examples, each of which contains a known "input" and "result," forming probability-weighted associations between the two, which are stored within the data structure of the net itself.

#### Natural Language Processing (NLP)

Algorithms designed to process and analyze large amounts of unstructured natural language data. Involve speech recognition, natural-language understanding, and generation, and generative pretrained transformers (GPT) algorithms.

## 8 Parts = 2 Rings x 4 Clusters of Tools
